

EXPERIENCE

- Project Lead, Game Designer & Game Developer** Remote
Media Lab May 2025 - Present
 - VR Unity Development:** Designed and implemented gameplay systems, levels, interactions, and progression flows in Unity for an educational VR experience.
 - Client-facing Lead:** Led development workflows using Git, version control, coordinating implementation, and feature prioritization, while translating client feedback into actionable technical design decisions within Unity production pipelines, managing workflows, validating GDDs and iterative feature integration.
 - Team Collaboration:** Managed a team of four, coordinating tasks, prioritizing features, arranging and conducting team meetings, and ensuring delivery with on-time milestones and flexible work hours.
- Technical Game Designer & Game Developer** Remote
Ludomancer Studio Nov 2023 - Present
 - Gameplay Balancing:** Collaborated directly with development, design, and production teams to improve gameplay economy, clarity and feature consistency.
 - Systems Design & Technical Implementation:** Configured, developed, and iterated gameplay systems, mechanics, balancing, UI/menus, and progression, across several distinct PC and mobile titles, through rapid prototyping and playtesting, maintaining communication to improve team alignment.
 - Game Design:** Contributed to PC and mobile-oriented gameplay systems with focus on readability, accessibility, and player experience, working directly within engine-based implementation workflows, refining gameplay behavior and feature presentation.
 - Unity Development, Cross-Functional Work & QA Support:** Translated design concepts into full features, and contributed to the QA process by identifying and fixing game issues through rapid prototyping and play-testing, while supporting cross-team production workflows
 - Team Collaboration:** Collaborated cross-functionally in a remote indie team with regular meetings, aligning design, engineering, and production constraints.
- Intern of Technology** Remote
Radix Engineering and Software May 2022 - May 2023
 - Software Development:** Contributed to system implementation, focusing on performance optimization, within collaborative, version-controlled environments (Git, CI/CD), using Scrum and Kanban methodologies.

EDUCATION

- Federal Fluminense University Computer Science Institute** Niterói, Brazil
Bachelor of Systems of Information Aug 2020 - Present

PROJECTS

- Prison Break – Escape Big Sister:** 2D stealth platformer demo made in Python (Pygame), available on itch.io.
- Research:** Currently documenting the history of video games by playing culturally relevant games in chronological order, starting from 1947, so my backlog is close to infinite.
- TTRPG System:** At present designing my own 2d10 TTRPG system, balancing mechanics, economy, and progression through advanced spreadsheet formulas, playtesting, and receiving feedback from real players.

PROGRAMMING SKILLS

- Skill Sets:** Gameplay Systems, Balancing, and Progression Design, GDDs, Technical Implementation, QA Support
- Languages:** C#, C++, Python, JavaScript, TypeScript, HTML/CSS
- Technologies:** Git / GitHub / GitLab, Unity, Unreal Engine (small prototype project), Godot, Pygame, RPG Maker
- Certified English Proficiency:** C1
